- Tools & Practices: Git, GitHub, AWS, UI/UX Optimization

PROJECTS

DukaanAI – AI-Powered Business Assistant

OpenAI x Outskill AI Builders Hackathon

- An AI assistant that lets shopkeepers manage inventory, invoices, and credit ledgers just by typing natural-language requests – built with React.js, Spring Boot, and the OpenAI API (JSON command mode) over a 2-day hackathon sprint.
- Scored 88/100 overall, with perfect marks in Usefulness, Creativity, and Presentation.

Loonemi – Loan & EMI Planning Platform (naikaa.me)

- A loan/EMI planner that breaks repayments down into a dynamic amortization schedule and charts principal vs. interest over time, built with JavaScript and Tailwind CSS.

Smart Parking Dashboard

- A dashboard for tracking parking slot availability in real time – shows an interactive status grid (open/occupied) and logs reservation timestamps, built with HTML5, CSS Grid, and JavaScript.

EXPERIENCE

Freelance Full-Stack Developer

Present

- Built and shipped 3 client websites, focusing on UI/UX improvements that boosted user engagement, using React.js and Node.js.

AI Product Builder – OpenAI x Outskill AI Builders Hackathon

- Designed DukaanAI, integrating OpenAI APIs in JSON command mode to translate natural language into structured, SQL-equivalent business commands.
